

# Kelvindale Primary School

Where are we now?

October 2020

## Teaching & Learning

Staff are skilled in using formative assessment strategies to establish where the children are in their learning journey. Assessments are being used to plan next steps in learning. Targeted support is being deployed to reflect the needs of individuals.

## Health and Safety

In line with Scottish Government and GCC guidance, we have developed our school's 'live' risk assessment to include:

- Staggered arrival/departure times, intervals and lunches.
- Regular hand-washing.
- One way systems.
- Enhanced opportunities for outdoor learning.
- Indoor class bubbles and outdoor stage bubbles.

## Community & Partners

We have gathered views from children, parents/carers and staff about their return. We have met virtually with the Parent Council and the PTA. We regularly communicate with parents/carers to keep them informed of changes and updates.

## Our Vision

Children remain at the heart of everything we do at Kelvindale Primary School.

## Wellbeing

We are using Children's Parliament resources to help us re-connect and discuss lockdown experiences. The children of Kelvindale are ready to learn, which has been evidenced through class conduct, school ethos and digital surveys. Play pedagogy & Outdoor Learning are enabling children to re-connect with their learning environment, peers and key adults.
