

Climate Week

4th - 10th March 2013

Pupils from P7 went to Cleveden Secondary School to represent Kelvindale Primary and participate in the Climate Week Challenge. The challenge was to design a park that would promote eco and sustainability. The Kelvindale Team worked collaboratively and mind mapped lots of interesting ideas. Their ideas included;

- A solar powered café which sells and promotes fair trade produce
- An app for an I-phone or an android phone where the user downloads the app for free and helps the RSPB track birds in the park.
- Allotments where plants and vegetables are grown organically
- A park ranger who provides free guided information tours of plant and animal species in the park
- Bird boxes that have cameras that record birds and this information would be uploaded to the RSPB
- Creative Corners where children are encouraged to build bird or bat boxes

As a result of these super ideas, Kelvindale was awarded 2nd place. Well Done!
